

PROFILE OF SWPA POWER

In The 8th Congressional District of Missouri

Almost 326,000 constituents in the 8th Congressional District of Missouri enjoy the benefits of clean, renewable and efficient hydropower generated at Corps of Engineers multipurpose reservoirs and marketed by the Southwestern Power Administration. SWPA power distributed to businesses and industry also supports **almost 30,000 jobs** in the district with a payroll of **more than \$480 million annually**.

The power marketed by SWPA is generated at 24 Corps projects in the region, including five in Missouri: Bull Shoals, Clarence Cannon, Harry S. Truman, Stockton and Table Rock. In 2001 these five dams generated **902 million kWh** of electricity, or more than 19 percent of the energy generated by SWPA's system. SWPA customers, through their electric rates, will repay 32 percent of the entire cost of constructing these five lakes — **more than \$456 million** — *plus interest!*

SWPA power is distributed in the district by the following consumer-owned, not-for-profit electric systems:

- **Associated Electric Cooperative, Inc.**, Springfield
