

PROFILE OF SWPA POWER In The 6th Congressional District of Texas

More than 42,000 constituents in the 6th Congressional District of Texas enjoy the benefits of clean, renewable and efficient hydropower generated at Corps of Engineers multipurpose reservoirs and marketed by the Southwestern Power Administration. SWPA power distributed to businesses and industry also supports **more than 7,000 jobs** in the district with a payroll of **almost \$163 million annually**.

The power marketed by SWPA is generated at 24 Corps dams in the region, including four in Texas: Denison Dam/Lake Texoma, Robert D. Willis/B.A. Steinhagen Lake, Sam Rayburn and Whitney. In 2001 these four dams generated **607 million kWh** of electricity, or more than 13 percent of the energy generated by SWPA's system. SWPA customers, through their electric rates, will repay 29 percent of the entire cost of constructing these four lakes — **almost \$8.2 million** — *plus interest!*

SWPA power is distributed in the district by the following consumer-owned, not-for-profit electric systems:

- **Brazos Electric Power Cooperative, Inc.**, Waco
- **Cherokee County Electric Cooperative Association**, Rusk
- **Denton County Electric Cooperative, Inc.**, Corinth
- **Johnson County Electric Cooperative Association**, Cleburne
- **Navarro County Electric Cooperative, Inc.**, Corsicana
- **Northeast Texas Electric Cooperative**, Longview
- **Tex-La Electric Cooperative of Texas**, Nacogdoches
- **Tri-County Electric Cooperative, Inc.**, Azle
